주: 실업률은 계절조정 기준(연간 제외)이며 국고채 수익률 · 종합주가지수 · 원/달러 환율은 기말 기준, 유가(두바이)는 기간평균 기준, 주택가격은 전기대비 증가율 기준임.

요약 및 평가※

■ 우리 경제는 AI 관련 투자와 밀접한 부문을 중심으로 개선 흐름을 유지

- 국내외 AI 인프라 투자 확대에 힘입어 수출과 설비투자가 높은 증가세를 이어간 가운데, 관련 부문의 제조업생산도 증가를 지속
 - 수출과 설비투자가 반도체를 중심으로 높은 증가세를 지속하였으며, 금속가공, 전기장비, 기계장비 등 AI 투자와 관련된 부문의 생산도 비교적 양호한 모습
- 그럼에도 불구하고 경기 개선이 가계 전반의 소득으로 충분히 파급되지 못하면서 소비 개선세는 완만한 모습
 - 서비스업생산도 소비와 밀접한 도소매, 숙박 및 음식점 등의 업종을 중심으로 높았던 증가세가 조정되는 모습
- 한편, 중동 정세 불안과 미국의 통상정책을 둘러싼 불확실성은 여전히 높은 수준

※ 별도의 언급이 없을 경우 모든 증가율은 전년동월대비 기준임.

■ **생산은 서비스업 증가폭이 축소되었으나, 제조업 생산이 증가 흐름을 유지하며 전반적인 개선세를 이어감.**

● 7월 전산업생산(4.4% → 3.1%)은 전월에 비해 증가폭이 축소되었으나, 2/4분기 평균(2.9%)을 상회하는 수준을 기록하며 개선 흐름을 지속

– 광공업생산(6.0% → 3.6%)은 높은 기저와 조업일수(+1.5일 → -1.0일) 감소의 영향으로 증가폭이 축소되었으나, 계절조정 전월대비로는 0.2% 증가하며 전월의 반등세를 이어갔으며 평균가동률(74.7% → 74.9%)도 높은 수준을 유지

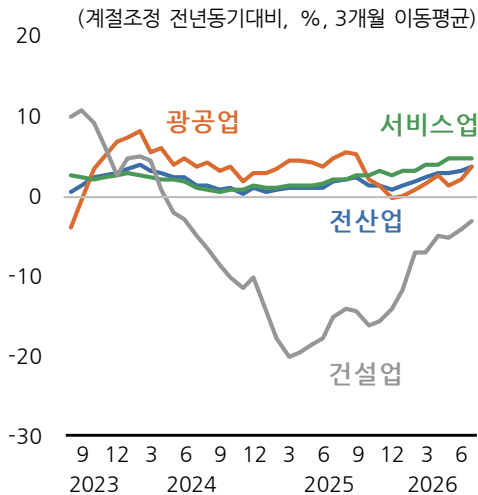

* 반도체(0.8%)가 기저효과로 증가폭이 낮은 반면, 기계장비(9.6%), 금속가공(6.9%), 전기장비(4.0%) 등 AI 인프라 투자와 연관성이 높은 일부 품목은 양호한 증가세를 보임.

– 서비스업생산(5.4% → 3.5%)은 도소매업(4.1% → 0.1%)의 증가폭이 축소되고 숙박 및 음식점업(1.1% → -1.0%)이 감소로 전환되면서 증가폭이 축소되었으며, 계절조정 전월대비로도 주식거래 둔화로 금융 및 보험업(-4.8%)이 감소하며 1.3% 감소

– 한편, 건설업생산(-4.3% → -3.2%)은 주거용 건축을 중심으로 감소세 지속

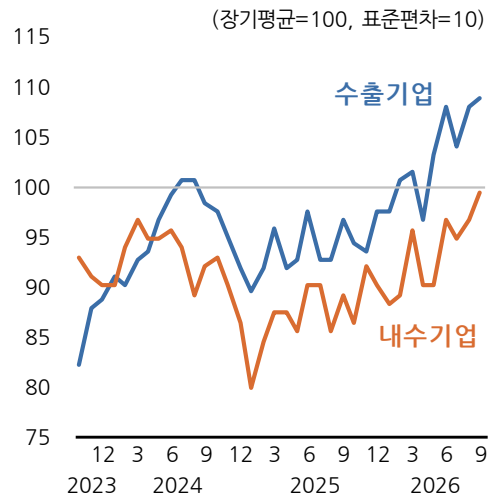

● 수출기업 심리가 양호한 수준을 유지하는 가운데, 내수기업 심리도 개선세를 이어감.

산업별 생산지수

자료: 국가데이터처; 한국은행.

업황BSI 전망

■ 소비는 가게 구매력의 회복이 제한되면서 개선세가 완만한 모습

● 7월 소매판매액지수(3.9% → -0.8%)는 일시적인 요인 등에 기인하여 감소로 전환

– 내구재(10.3% → -4.1%)는 승용차(11.9% → -2.5%), 가전제품(13.0% → -0.8%), 통신 기기 및 컴퓨터(14.7% → -14.2%)가 모두 감소하면서 전체 소매판매의 하락을 주도

* 승용차와 가전제품 판매 감소에는 각각 자동차 개별소비세 인하와 주요 업체 판촉행사의 종료에 따른 영향이 반영되었으며, 통신기기 및 컴퓨터 판매 감소에는 전년 동월 통신사의 번호이동 위약금 면제에 따른 기저효과가 작용한 것으로 판단

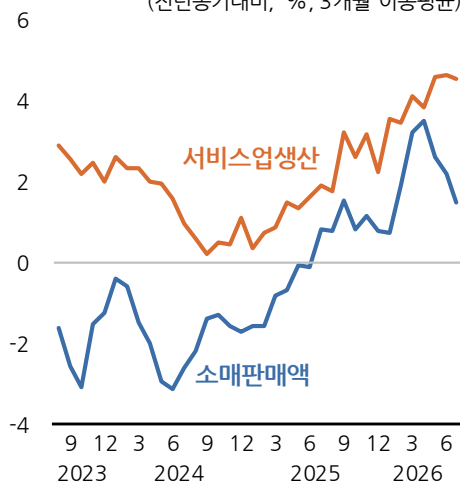

– 이와 함께 전년동월 소비쿠폰 지급 등으로 인한 기저효과에 일부 기인하여 준내구재(1.2% → -0.2%)가 감소로 전환하고 비내구재(1.8% → 0.7%)도 낮은 증가세를 기록

– 월별 변동을 완화한 6~7월 평균으로는 소매판매액이 1.5% 증가하였으나, 이는 1/4분기 평균(3.2%)을 하회하는 수준으로 소비 개선 흐름이 완만한 모습

* 상반기 전체 근로자의 실질임금 상승률이 0.3%에 머무는 등 가게 구매력의 회복이 제한되면서 소비 개선을 제약

소매판매액 및 서비스업생산

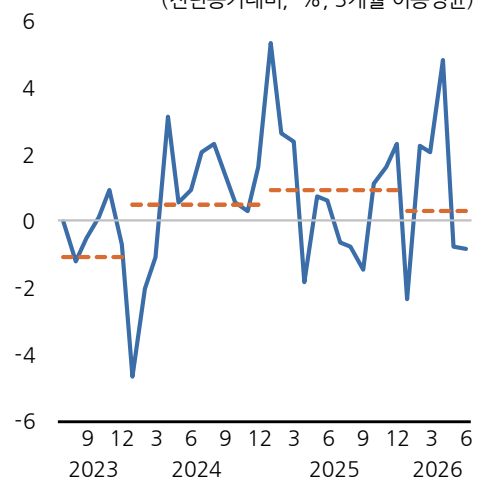

(전년동기대비, %, 3개월 이동평균)

주: 점선은 각 연도의 평균임.
자료: 국가데이터처; 한국은행.

실질임금 상승률

(전년동기대비, %, 3개월 이동평균)

■ 설비투자는 반도체 관련 부문을 중심으로 호조를 이어감.

● 7월 설비투자(22.5% → 24.9%)는 반도체 관련 투자가 크게 증가한 가운데 여타 기계류도 양호한 모습을 보이며 높은 증가세를 지속

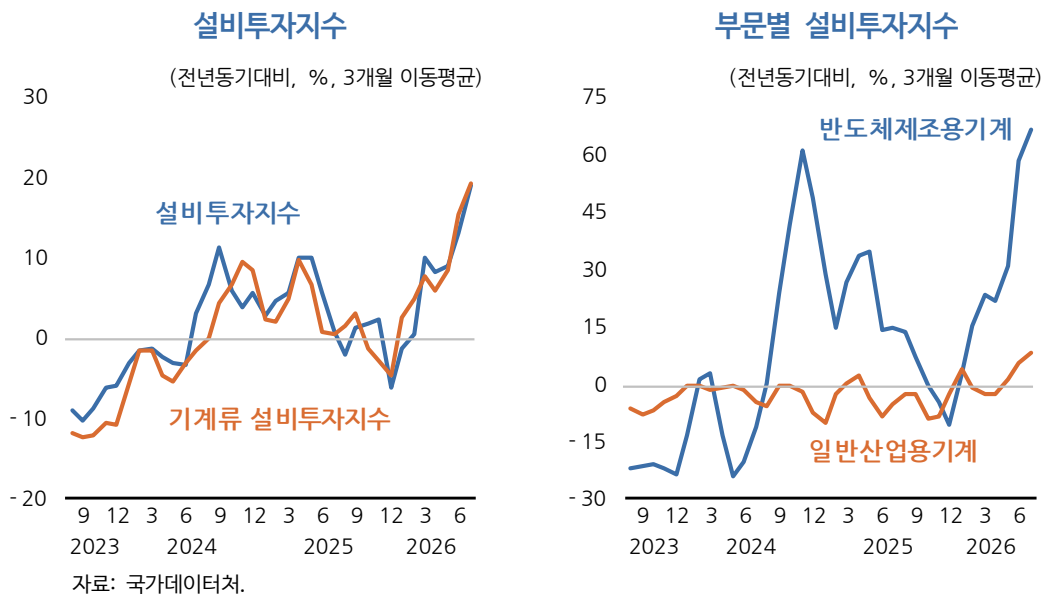

– 기계류(23.3% → 21.3%)는 반도체제조용장비(61.7% → 66.0%), 전기 및 전자기기(17.9% → 11.0%) 등 AI 인프라 투자 관련 부문이 높은 증가세를 이어간 가운데, 일반산업용기계(12.6% → 12.1%)도 개선되며 양호한 흐름을 유지

– 다만, 최근 이례적으로 높은 설비투자 증가에는 기저효과와 함께 변동성이 큰 운송장비(20.8% → 32.7%)가 크게 증가한 영향도 상당 부분 반영된 것으로 판단됨.

* 개소세 인하 종료로 앞두고 급증했던 자동차(30.0% → 1.9%)의 증가폭이 축소되었으나, 기타운송장비(6.4% → 83.9%)가 급증하면서 운송장비 증가세는 높은 수준을 유지

● 선행지표도 반도체 관련 투자의 견조한 흐름이 당분간 이어질 가능성을 시사

– 8월 반도체제조용장비 수입액(60.1% → 96.5%)의 증가폭이 크게 확대되었으며, 7월 국내 기계수주(52.4% → 25.4%)도 특수산업용기계(85.5% → 55.1%)와 의료정밀측정제어기기(78.1% → 95.7%) 등 반도체 제조장비가 포함된 부문을 중심으로 증가

■ **건설투자는 주거용 건축을 중심으로 부진이 지속되고 있으나, 비주거용 건축의 개선 흐름은 유지**

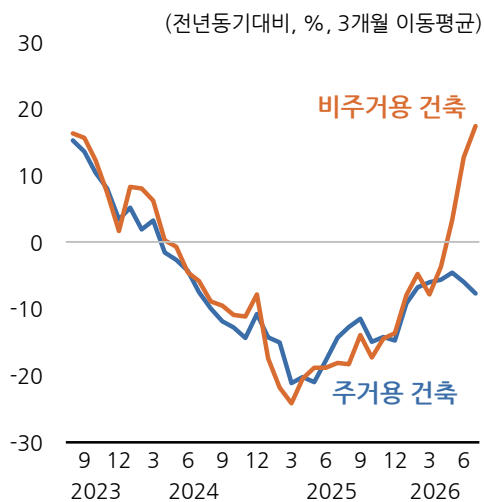

● 7월 건설기성(-4.3% → -3.2%)은 주거용 건축을 중심으로 감소세 지속

- 건축(-2.9% → -5.5%)은 감소폭이 확대된 반면, 토목(-8.0% → 4.4%)은 플랜트 공사를 중심으로 증가로 전환
- 경상 기준으로, 비주거용 건축(22.2% → 11.3%)의 개선 흐름이 지속되었으나, 주거용 건축(-9.4% → -7.9%)의 침체가 지속되며 전체 건설투자의 부진을 주도

● 선행지표는 비주거용 건축의 양호한 흐름이 이어질 가능성을 시사하나, 주택부문의 부진과 건설비용 상승으로 건설투자 전반의 회복 속도는 완만할 전망

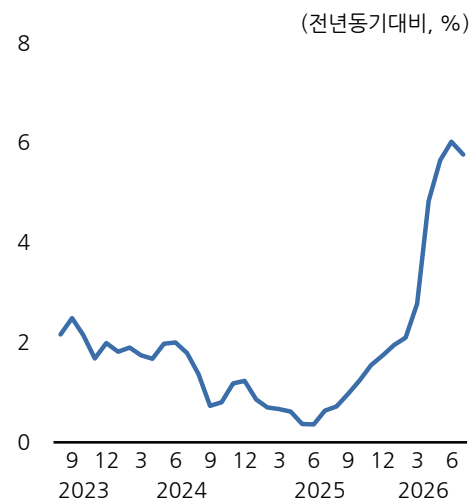

- 반도체 공장 등이 포함된 민간 부문의 공장 및 창고 수주가 양호한 증가세를 나타냄.
 - * 민간 공장 및 창고 수주(%): (1/4분기) 82.7 → (2/4분기) 35.9 → (7월) 10.3
- 반면, 주택 인허가(2.6만호)와 착공(2.0만호)은 2021~25년 평균(각각 3.8만호, 2.9만호)을 상당 폭 하회하여, 향후 주거용 건축의 회복이 지연될 가능성을 시사
- 건설기성 디플레이터 상승률도 여전히 높은 수준을 유지하여 건설투자의 회복을 제약할 가능성

건설기성(경상)

자료: 국가데이터처.

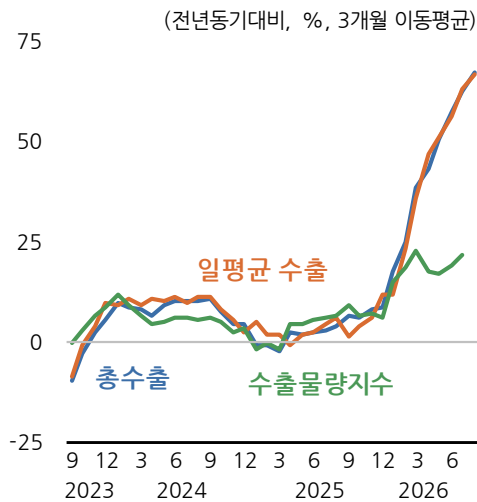

건설기성 디플레이터

■ 수출은 통상 환경의 불확실성이 지속되었으나, 글로벌 AI 관련 투자 수요가 견조하게 유지되며 호조를 이어가는 모습

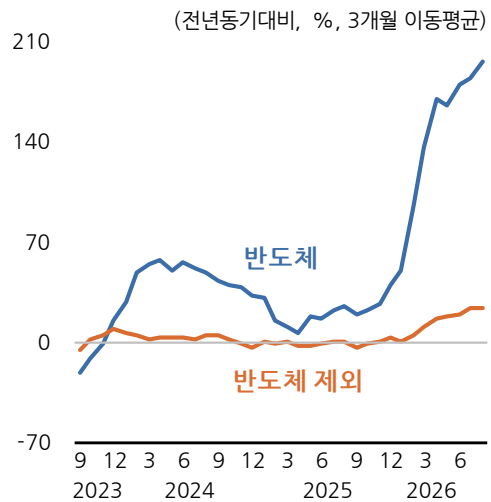

- 8월 수출(68.7%, 일평균 72.5%)은 ICT 품목을 중심으로 높은 증가세를 이어감.
 - 일평균 금액 기준으로 반도체(216.1%)와 컴퓨터(431.2%)가 가격 급등으로 대폭 증가한 가운데 AI 인프라 투자 확대 등으로 철강제품(10.4%)과 비철금속(26.7%)도 양호한 모습
 - * 일평균 물량 기준으로도 반도체를 포함하는 컴퓨터·전자 및 광학기기(7월, 30.4%)가 높은 증가율을 기록
- 수입(22.5%)은 원유 도입단가가 높은 수준을 지속하며 주요 에너지원(10.3%)이 증가한 가운데, 이를 제외한 품목(26.4%)도 반도체장비(117.3%)를 중심으로 증가
 - 원유 도입단가(%): (6월) 67.0 → (7월) 43.5 → (8월) 25.6
- 수출이 수입보다 큰 폭으로 증가하며 무역수지(347.5억달러)는 대규모 흑자를 지속
- 한편, 중동 지역의 긴장이 이어지며 대외 통상 불확실성이 지속되는 모습
 - 지역 내 긴장 재고조에 따른 물류 차질 등의 영향으로 중동으로의 수출(일평균, -13.1%)이 감소하였으며, 원유 도입물량(7.5% → -3.5%)도 감소

총수출, 일평균 수출 금액 및 수출물량지수

자료: 산업통상부; 한국무역협회; 한국은행.

일평균 반도체 및 반도체 제외 수출 금액

■ 노동시장은 둔화 흐름이 다소 완화되었으나, 청년층의 고용 회복은 제한적인 모습

- 7월 취업자 수(6.3만명 → 10.8만명)는 제조업의 감소폭 축소 등에 기인하여 전월보다 증가폭이 확대되었으나, 여전히 낮은 수준에 머무름.

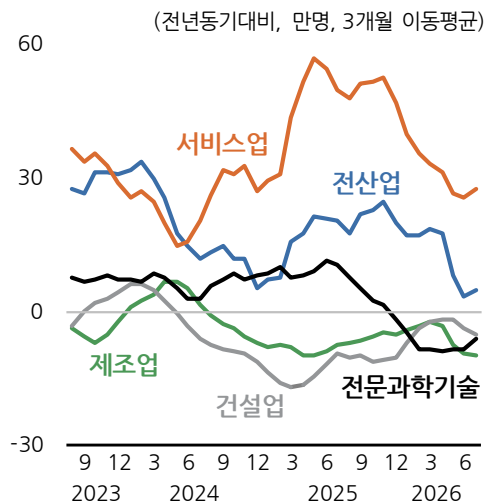

- 제조업(-9.7만명 → -6.8만명)은 상용직(-6.6만명 → -4.7만명)을 중심으로 감소폭이 축소
- 서비스업(29.3만명 → 27.5만명)은 보건업 및 사회복지 서비스업(21.4만명 → 17.3만명)의 높은 증가세가 조정되었으나, 전문, 과학 및 기술 관련 서비스업의 부진이 점차 완화되며 비교적 양호한 흐름을 유지

* 전문, 과학 및 기술 서비스업: (5월) -8.9만명 → (6월) -6.0만명 → (7월) -4.4만명

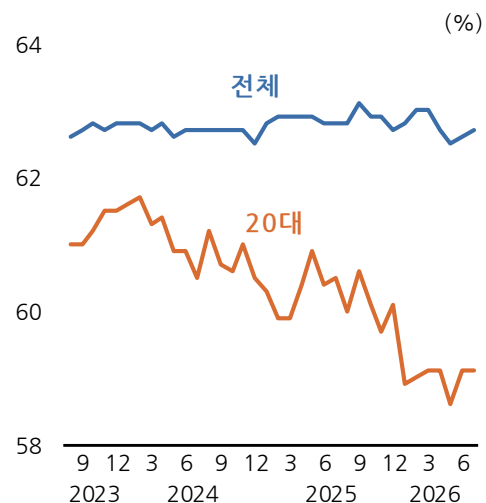

- 계절조정 고용률(62.6% → 62.7%)과 경제활동참가율(64.4% → 64.6%)은 중고령층을 중심으로 상승

- 50대와 60세 이상의 고용률이 각각 0.5%p, 0.2%p 증가하며 전체 고용률 상승을 주도
- 다만, 20대 고용률(59.1%)은 전월과 동일한 낮은 수준에 정체되는 가운데, 실업률도 0.5%p 상승하는 등 청년층의 고용 여건 개선은 제약되는 모습

주요 산업별 취업자 증감

연령별 고용률(계절조정)

■ 소비자물가는 기저효과에 주로 기인하여 큰 폭으로 상승하였으나, 이를 제외한 기초적인 물가 상승세는 전월과 유사한 수준을 유지

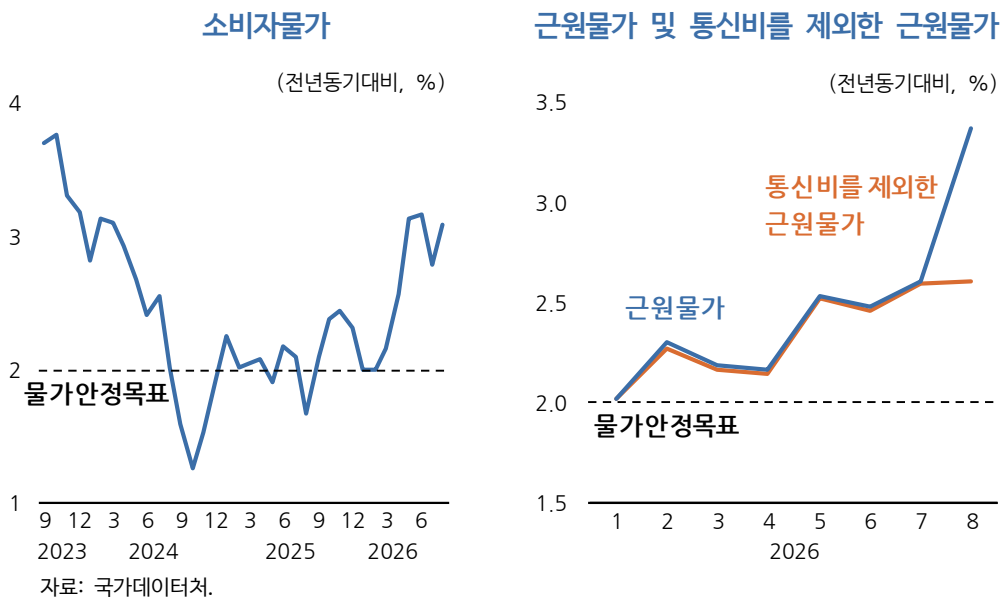

● 8월 소비자물가(2.8% → 3.1%)는 통신비 관련 기저효과에 기인하여 전월보다 확대

- 전년 동월 시행된 통신비 할인에 따른 기저효과와 영향으로 공공서비스(1.4% → 6.5%)가 큰 폭으로 상승하였으며, 이는 소비자물가 상승률 변동의 대부분을 설명
- 반면, 농축수산물(0.9% → -2.6%)은 농산물을 중심으로 기저효과에 주로 기인하여 하락
- 석유류(15.5% → 14.2%)는 최고가격제 수준이 유지되면서 전월과 유사한 상승세를 지속하였으나, 지정학적 위험이 재차 부각되면서 향후 상방 압력이 확대될 가능성도 상존

* 두바이유(달러/배럴, 월평균): (6월) 79.5 → (7월) 76.8 → (8월) 88.8

● 기초적인 물가 상승률이 높게 유지되는 가운데, 통신비 관련 기저효과도 작용하며 근원물가(식료품·에너지 제외, 2.6% → 3.4%)의 상승폭도 크게 확대

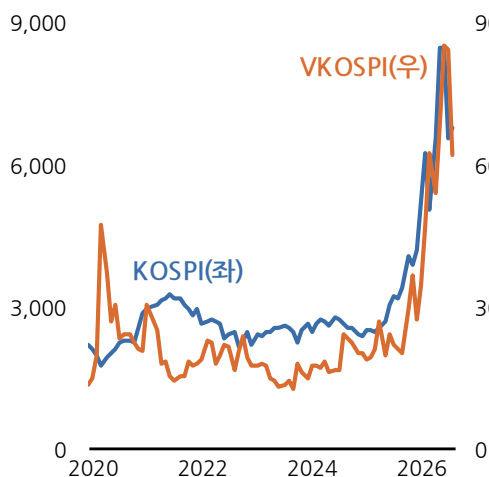

- 통신비의 영향을 제외한 근원물가 상승률은 전월과 동일한 2.6%로 기초적 물가상승 압력이 추가로 확대되지는 않았으나, 여전히 물가안정목표를 상회하는 높은 수준을 유지함.
- 근원물가의 높은 상승세에는 국내 수요 압력뿐 아니라 글로벌 반도체 수요 확대와 중동 사태에 따른 공급 측 요인도 주요하게 작용한 것으로 판단됨.

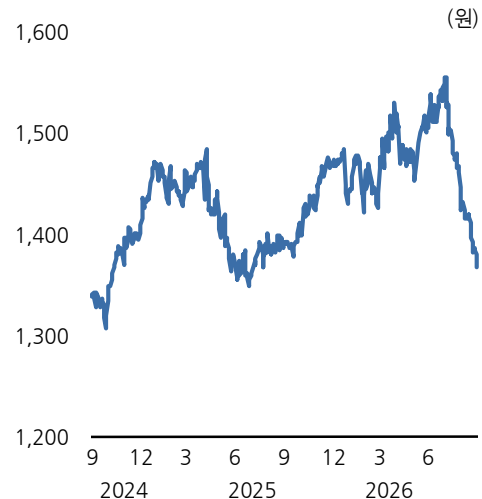

■ 금융시장은 주식시장을 중심으로 높은 변동성이 지속되었으나, 신용시장 전반의 안정세는 유지되는 모습

- 8월 시장금리는 기준금리 인상의 영향으로 상승세를 지속
 - 국고채금리(3년, 월말, %): (5월) 3.73 → (6월) 3.70 → (7월) 3.76 → (8월) 3.84
- 환율은 기준금리 인상과 글로벌 달러 약세 등의 영향으로 비교적 큰 폭으로 하락
 - 원/달러 환율(월말): (5월) 1,507.9 → (6월) 1,549.4 → (7월) 1,424.0 → (8월) 1,368.6
- 주식시장의 변동성이 여전히 높은 가운데, 시장금리 상승에도 불구하고 AI·반도체 업황 개선 기대가 반영되며 주가는 소폭 상승
 - KOSPI(월말): (5월) 8,476.2 → (6월) 8,476.5 → (7월) 6,595.5 → (8월) 6,820.0
 - KOSPI200 변동성지수(VKOSPI, 월평균, 84.6 → 62.2)는 전월에 비해서는 하락하였으나, 여전히 장기 평균(20.4, 2015년 이후)을 크게 상회
- 기업대출 연체율이 분기 말 요인으로 하락한 가운데, CDS 프리미엄도 낮은 수준을 지속하는 등 신용위험 지표는 비교적 안정적인 모습
 - 5월까지 상승세를 지속하던 은행권 기업대출 연체율은 6월 들어 금융기관의 분기 말 재무 건전성 관리 등의 영향으로 비교적 큰 폭으로 하락
 - 정부 외화채권의 부도위험을 반영하는 CDS 프리미엄(8월 말, 21.6bp)은 전월(22.8bp)에 이어 장기 평균(38.5bp, 2015년 이후)을 하회

주가 및 주가변동성 지수

■ 주택시장은 수도권을 중심으로 매매가격과 임대가격이 모두 높은 상승세를 지속

● 7월 전국 주택매매가격※(전월대비, 0.33% → 0.35%)은 수도권을 중심으로 상승세가 확대됨.

– 서울(1.03% → 1.09%)과 경기(0.59% → 0.65%) 지역의 매매가격 상승률이 전월보다 확대되며 수도권 주택매매가격(0.67% → 0.72%)의 높은 상승세가 지속됨.

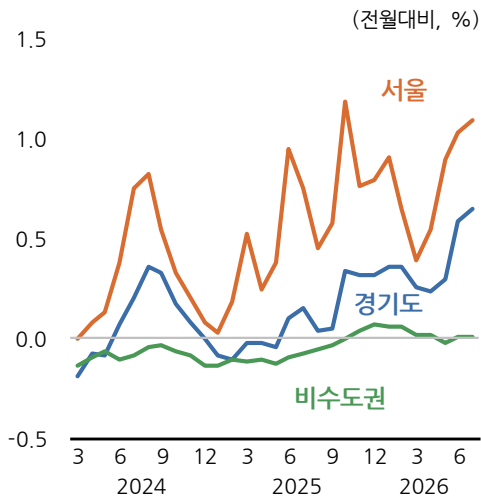

– 반면, 비수도권은 매매가격(0.01% → 0.01%)이 정체된 가운데 거래량(3.0만호 → 2.8만호)도 최근 3년(2023~25년)의 7월 평균(2.9만호)을 하회하며 부진한 모습

● 주택임대가격(전세: 0.38% → 0.38%, 월세: 0.38% → 0.38%)도 수도권을 중심으로 높은 상승률을 지속

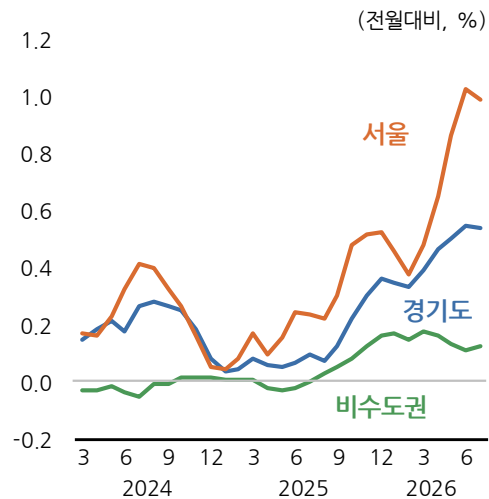

– 수도권의 전세가격(0.71% → 0.68%) 상승이 지속된 가운데, 수도권 월세가격(0.62% → 0.64%) 상승률은 2015년 이후 최고치를 기록하며 주거비 부담이 점증하는 모습

– 반면, 비수도권은 전세가격(0.08% → 0.10%)과 월세가격(0.15% → 0.14%) 모두 낮은 상승세 유지

주택매매가격

주택전월세통합가격

■ 세계경제는 제조업 경기 개선 기대에도 불구하고 중동 전쟁의 부정적 영향과 미국의 금리 인상 우려로 불확실성이 높은 수준을 유지

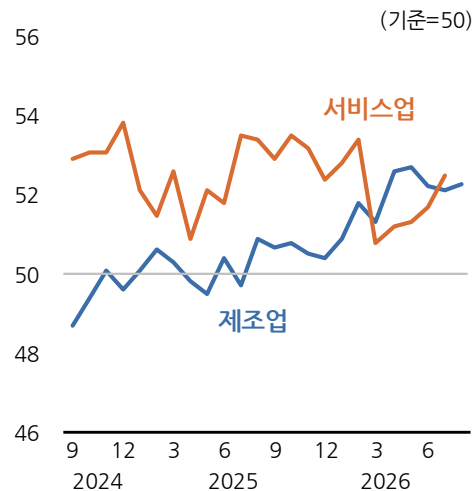

- 반도체 업황 호조로 글로벌 교역량 증가세가 확대된 가운데, 제조업 심리는 국가별로 차별화되었으나 전반적으로 상승하는 모습

글로벌 교역량과 반도체 매출액

자료: CPB; WSTS; 블룸버그.

글로벌 기업심리지수

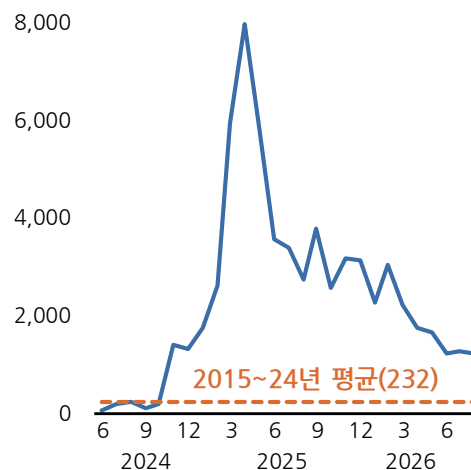

- 그러나 중동 전쟁과 미국의 통상정책 불확실성이 지속되는 등 세계경제의 하방 압력은 여전히 높음.

지정학적 위험지수

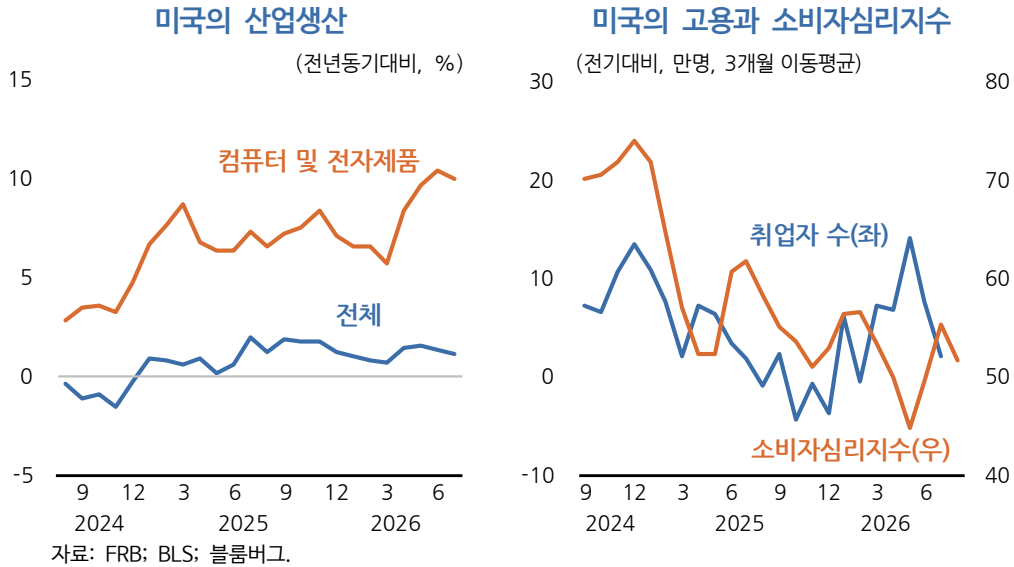

자료: 블룸버그.

미국의 통상정책 불확실성 지수

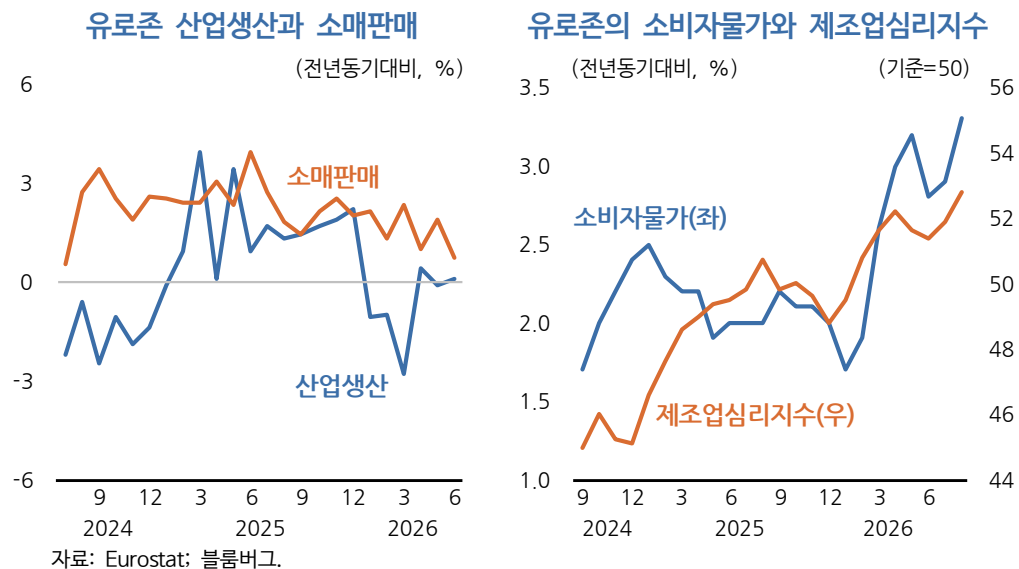

- 미국경제는 내수 중심의 완만한 성장세를 유지하고 있으나, 고용과 소비 여건을 둘러싼 불확실성이 점차 확대되는 모습

- AI 관련 업종의 생산과 투자가 양호한 흐름을 보였으나, 취업자 수 감소와 소비자심리지수의 하락 등 경기 하방 위험도 상존

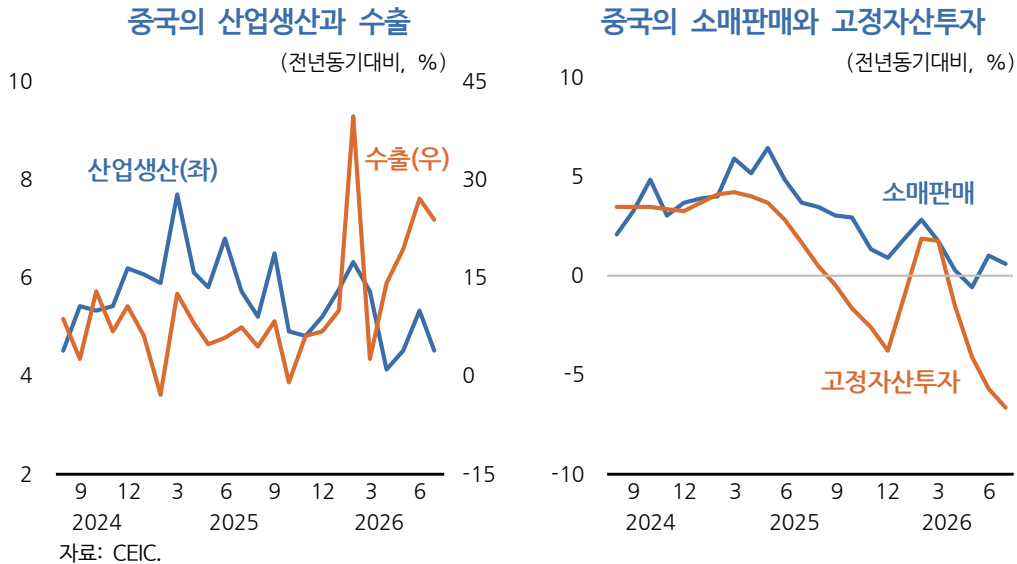

- 유로존 경제는 기업심리 개선에 따른 경기 회복 기대에도 불구하고, 중동 전쟁의 여파로 주요 실물지표가 부진한 흐름을 이어감.

- 제조업심리지수가 AI 관련 수요 확대 및 정부지출 증가로 확장 국면을 유지하였으나, 생산 정체와 소비자물가 상승세 확대로 경기 불확실성은 높은 수준을 유지

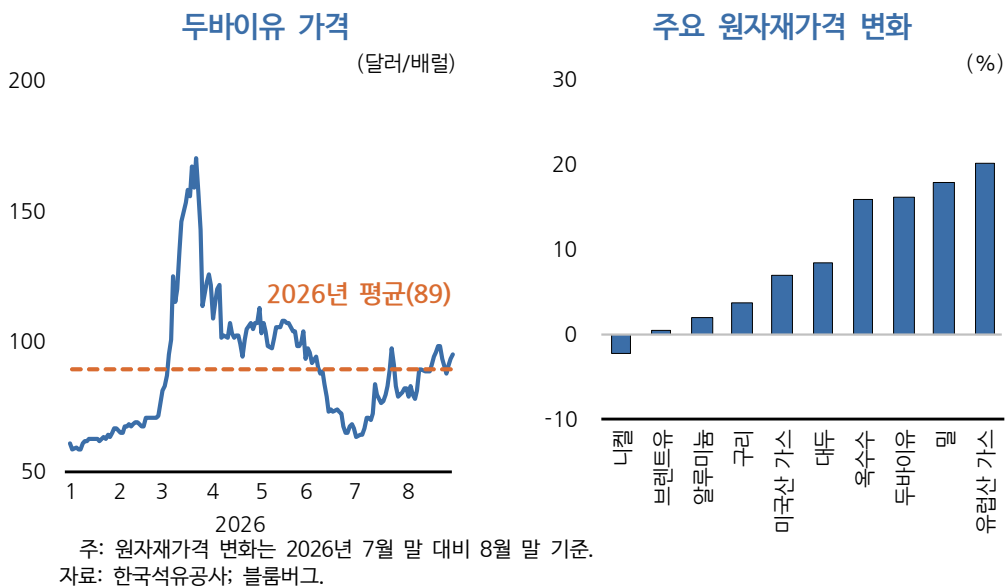

- 중국경제는 수출이 양호한 증가세를 유지하였으나, 내수 부진이 심화되면서 전반적인 경기 둔화 양상을 보이고 있음.

- 7월 산업생산, 소매판매, 그리고 고정자산투자의 증가율이 모두 하락하는 등 첨단산업 관련 투자와 수출을 제외한 대부분의 지표가 부진한 흐름을 지속

- 8월 유가는 중동 전쟁의 전개 상황에 따라 높은 변동성을 보였으며, 일부 원자재가격이 크게 상승

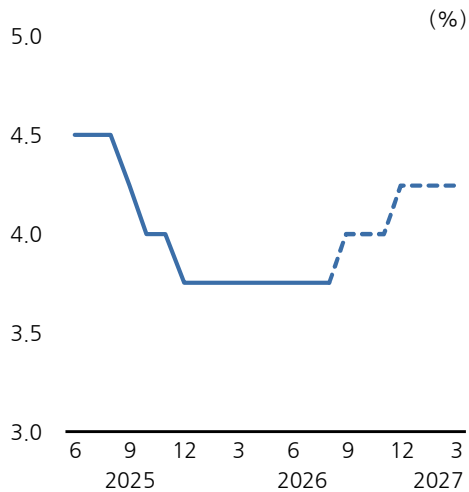

- 천연가스가격이 수급 차질 우려로 유럽 지역에서 가파른 상승세를 지속하였고, 주요 곡물도 공급 불안과 이상 기후 등으로 급등

● 국제금융시장은 중동 지역의 정세와 미국의 통화정책 전망 변화에 따라 주요 지표가 등락을 반복하는 모습

- 8월 미국 달러는 엔화를 제외한 주요 통화 대비 약세를 보였으나, 월말에 금리 인상 가능성이 확대되면서 다시 강세로 전환

미국의 기준금리 전망

달러 대비 주요국의 환율

Summary and Assessment※

■ **The Korean economy continues to improve**, led by sectors closely tied to AI-related investment.

- Exports and equipment investment continue to post strong growth amid expanding AI infrastructure investment at home and abroad, while manufacturing production continues to expand in related industries.
 - Exports and equipment investment continued to grow strongly, led by semiconductors, while production was relatively solid in AI investment-related industries such as fabricated metal products, electrical equipment, and machinery and equipment.
- Nevertheless, consumption is improving only gradually, as the broader economic improvement has yet to feed through fully to household incomes more broadly.
 - Services production growth has also moderated from its previously high pace, particularly in wholesale and retail trade and accommodation and food services, which are closely linked to consumption.
- Meanwhile, uncertainty remains elevated amid geopolitical instability in the Middle East and U.S. trade policy.

※ All growth figures are on a year-on-year basis unless otherwise noted. This document is an English translation of the original Korean version. In case of any ambiguities or discrepancies, the Korean version shall prevail.

■ Production continues to improve overall, supported by sustained growth in manufacturing despite slower growth in services.

- In July, all-industry production (4.4% → 3.1%) grew at a slower pace than in the previous month but remained above the second-quarter average (2.9%), consistent with continued improvement overall.

- Industrial (mining and manufacturing) production (6.0% → 3.6%) saw slower growth due to a high comparison base and fewer working days (+1.5 days → -1.0 day). On a seasonally adjusted month-on-month basis, however, output rose by 0.2%, extending the rebound seen in the previous month, while the average capacity utilization rate (74.7% → 74.9%) remained high.

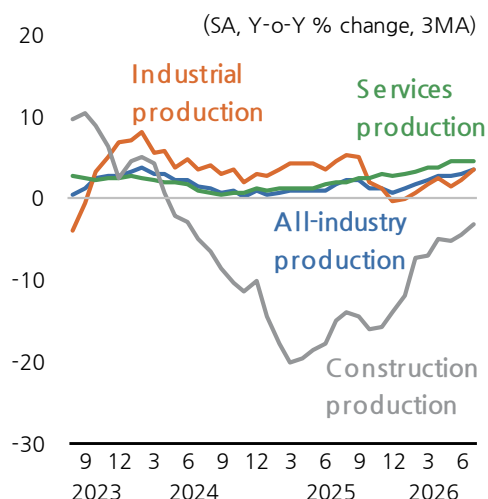

- * Semiconductor production (0.8%) posted only modest growth due to base effects, while some items closely associated with AI infrastructure investment –including machinery and equipment (9.6%), fabricated metal products (6.9%), and electrical equipment (4.0%)–recorded relatively solid growth.

- Services production (5.4% → 3.5%) also grew more slowly, as growth in wholesale and retail trade (4.1% → 0.1%) moderated and accommodation and food services (1.1% → -1.0%) shifted into decline. On a seasonally adjusted month-on-month basis, services production fell by 1.3%, as financial and insurance services (-4.8%) declined amid weaker stock trading.

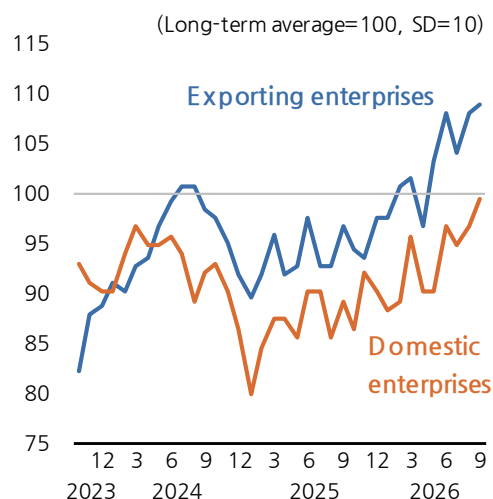

- Meanwhile, construction production (-4.3% → -3.2%) continued to decline, led by residential building construction.

- Business sentiment among exporting firms remains favorable, while sentiment among domestically oriented firms continues to improve.

Production Indices by Industry

Business Conditions BSI (Outlook)

Sources: Ministry of Data and Statistics; Bank of Korea.

■ **Consumption is improving only modestly**, constrained by the limited improvement in household purchasing power.

- In July, the retail sales index (3.9% → -0.8%) shifted into decline, partly reflecting temporary factors.

- Durable goods (10.3% → -4.1%) led the decline in overall retail sales, as passenger cars (11.9% → -2.5%), household electrical appliances (13.0% → -0.8%), and communication devices and computers (14.7% → -14.2%) all declined.

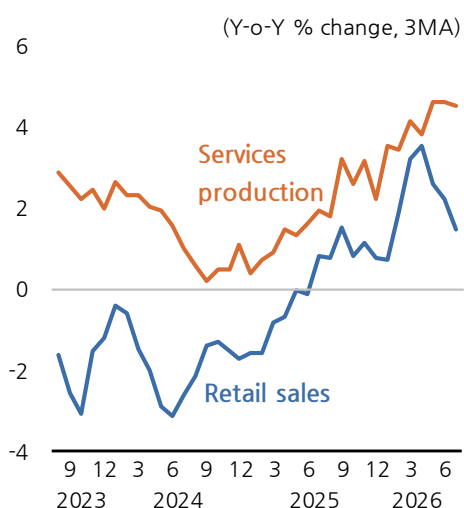

- * The declines in passenger car and household electrical appliance sales reflected, respectively, the expiration of the individual consumption tax cut on automobiles and the end of promotional campaigns by major firms. The decline in communication devices and computers appears to reflect base effects from telecom operators' waiver of early termination fees for customers switching carriers in the same month a year earlier.

- In part owing to base effects from the distribution of consumption vouchers and other factors in the same month a year earlier, semi-durable goods (1.2% → -0.2%) also shifted into decline, while non-durable goods (1.8% → 0.7%) posted only modest growth.

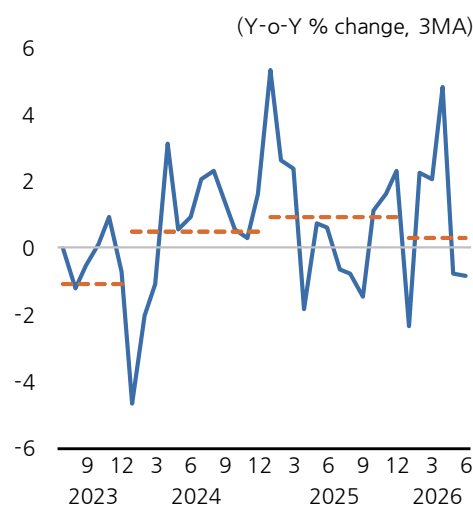

- On a June-July average basis, which smooths out monthly volatility, retail sales rose by 1.5%, below the first-quarter average (3.2%), suggesting that consumption continues to improve only gradually.

- * Overall real wage growth was limited to 0.3% in the first half of the year, indicating only a modest improvement in household purchasing power and constraining the improvement in consumption.

Retail Sales and Services Production

Real Wage Growth

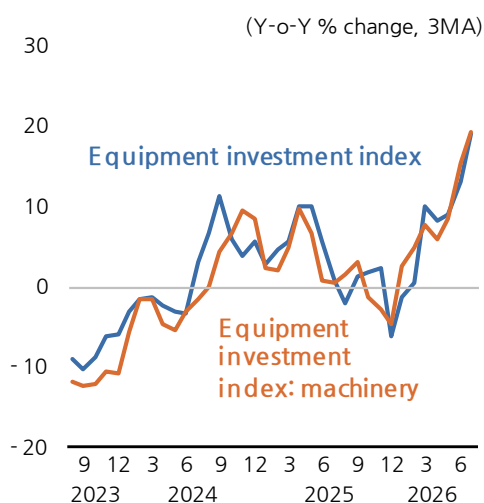

Note: The dotted lines indicate the average for each year.

■ Equipment investment remains strong, led by semiconductor-related sectors.

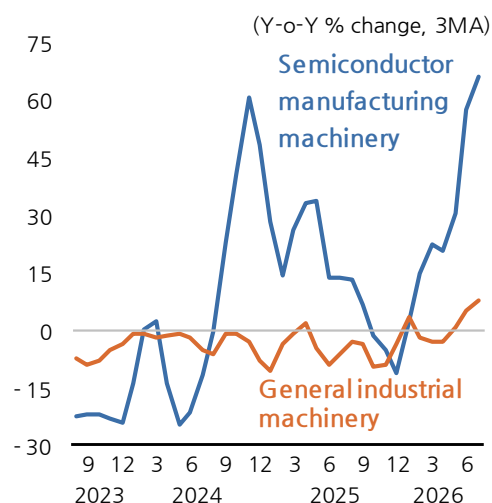

- In July, equipment investment (22.5% → 24.9%) continued to grow strongly, as semiconductor-related investment increased sharply and investment in other machinery also remained solid.
 - Machinery (23.3% → 21.3%) remained strong, supported by sustained growth in items associated with AI infrastructure investment, including semiconductor manufacturing equipment (61.7% → 66.0%) and electrical and electronic equipment (17.9% → 11.0%), while general industrial machinery (12.6% → 12.1%) also remained solid.
 - However, the unusually strong growth in equipment investment in recent months appears to reflect, to a considerable extent, base effects and a sharp increase in highly volatile transport equipment (20.8% → 32.7%).
 - * Growth in motor vehicles (30.0% → 1.9%), which had surged ahead of the expiration of the individual consumption tax cut, moderated. Nevertheless, transport equipment continued to grow rapidly, driven by a sharp increase in other transport equipment (6.4% → 83.9%).
- Leading indicators suggest that semiconductor-related investment is likely to remain robust for some time.
 - In August, growth in imports of semiconductor manufacturing equipment (60.1% → 96.5%) accelerated sharply. Domestic machinery orders (52.4% → 25.4%) also increased in July, led by categories that include semiconductor manufacturing equipment, such as special-purpose industrial machinery (85.5% → 55.1%) and medical, precision measurement and control equipment (78.1% → 95.7%).

Equipment Investment Index

Source: Ministry of Data and Statistics.

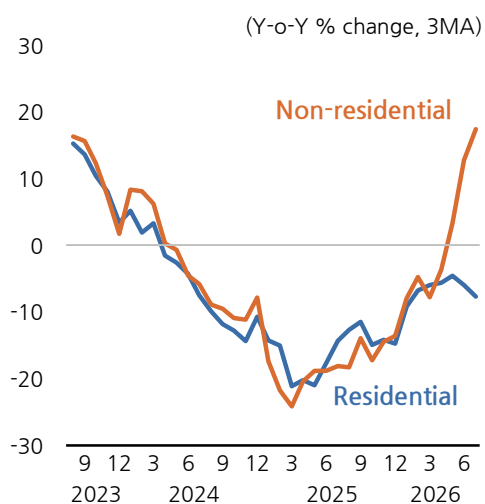

Equipment Investment Index by Category

■ **Construction investment remains weak, particularly in residential building construction**, while non-residential building construction continues to improve.

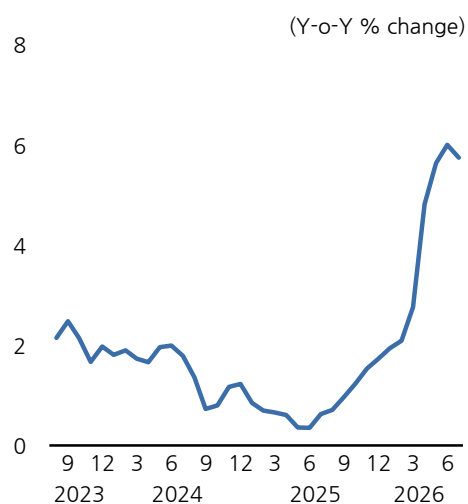

- In July, the value of construction completed ($-4.3\% \rightarrow -3.2\%$) continued to decline, led by residential building construction.
 - The decline in building construction ($-2.9\% \rightarrow -5.5\%$) widened, while civil engineering ($-8.0\% \rightarrow 4.4\%$) returned to growth, led by plant construction.
 - In current-price terms, non-residential building construction ($22.2\% \rightarrow 11.3\%$) continued to improve, but persistent sluggishness in residential building construction ($-9.4\% \rightarrow -7.9\%$) remained the main drag on overall construction investment.
- Leading indicators suggest that strength in non-residential building construction is likely to persist, but the recovery in overall construction investment is expected to remain gradual amid weakness in the housing sector and rising construction costs.
 - Private-sector orders received for factories and warehouses, including semiconductor plants, continued to post solid growth.
 - * Private-sector factory and warehouse orders (%):
(Q1) 82.7 $\rightarrow$ (Q2) 35.9 $\rightarrow$ (Jul.) 10.3
 - By contrast, housing permits (26,000 units) and starts (20,000 units) remained well below their 2021-25 averages (38,000 units and 29,000 units, respectively), suggesting that the recovery in residential building construction may be delayed.
 - Growth in the deflator for the value of construction completed also remains elevated, which could constrain the recovery in construction investment.

Construction Completed (Current prices)

Source: Ministry of Data and Statistics.

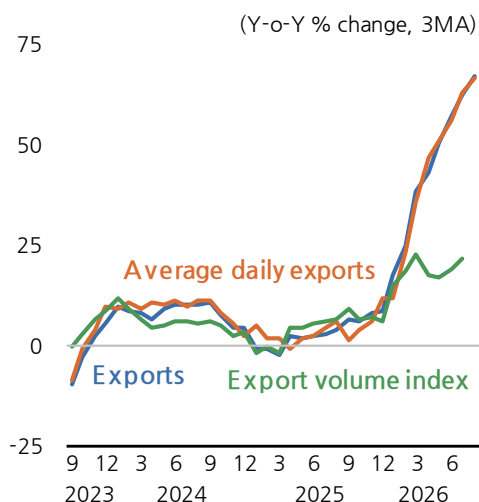

Construction Completed Deflator

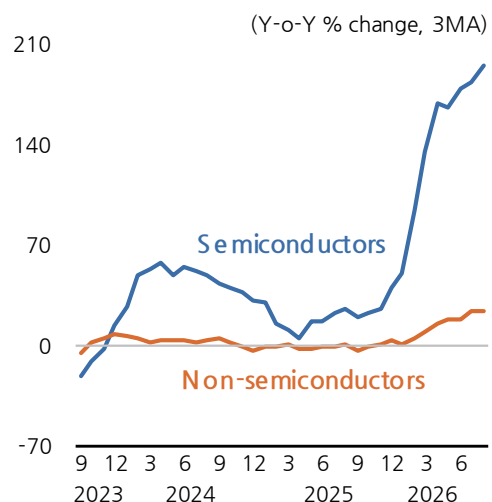

■ Exports remain strong despite persistent uncertainty in the trade environment, supported by sustained global demand associated with AI-related investment.

- In August, exports (68.7%, average daily: 72.5%) continued to grow strongly, led by ICT products.
 - In average daily value terms, semiconductor (216.1%) and computer exports (431.2%) rose sharply on the back of steep price increases, while steel products (10.4%) and non-ferrous metals (26.7%) also posted solid growth amid expanding AI infrastructure investment.
 - * In average daily volume terms, exports of computers, electronic and optical equipment (July, 30.4%), which include semiconductors, also grew strongly.
- Imports (22.5%) increased as imports of major energy sources (10.3%) rose amid persistently high crude oil import unit prices. Imports excluding major energy sources (26.4%) also grew, led by semiconductor equipment (117.3%).
 - Crude oil import unit prices (%): (Jun.) 67.0 → (Jul.) 43.5 → (Aug.) 25.6
- As exports grew substantially faster than imports, the trade surplus remained large at 34.75 billion dollars.
- Meanwhile, uncertainty over external trade conditions persists amid ongoing tensions in the Middle East.
 - Exports to the Middle East (average daily, -13.1%) declined amid logistics disruptions following a renewed escalation in regional tensions, while crude oil import volumes (7.5% → -3.5%) also decreased.

Exports, Average Daily Exports and Export Volume Index

Average Daily Exports: Semiconductor vs. Non-semiconductor

Sources: Ministry of Trade, Industry and Resources; KITA; Bank of Korea.

■ The labor market slowdown has eased somewhat, but the recovery in youth employment remains limited.

- In July, the year-on-year increase in the number of employed persons (63,000 → 108,000) widened from the previous month, supported in part by a smaller decline in manufacturing employment, but remained modest.

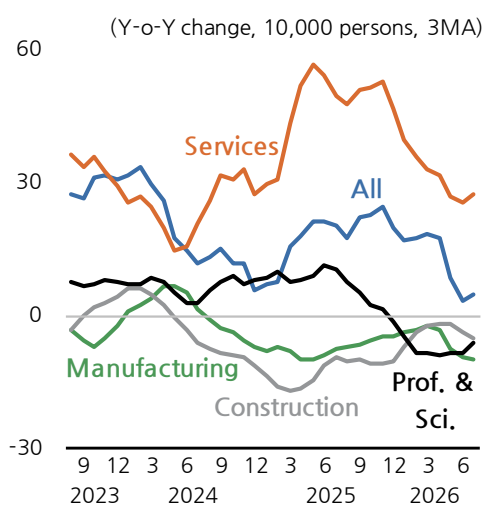

- The decline in manufacturing employment (–97,000 → –68,000) narrowed, led by permanent workers (–66,000 → –47,000).
- Employment growth in services (293,000 → 275,000) remained relatively solid. Although growth in human health and social work activities (214,000 → 173,000) moderated from its previously strong pace, weakness in professional, scientific, and technical services continued to ease.

* Professional, scientific, and technical services:
(May) –89,000 → (Jun.) –60,000 → (Jul.) –44,000

- The seasonally adjusted employment rate (62.6% → 62.7%) and labor force participation rate (64.4% → 64.6%) rose, led by middle-aged and older groups.

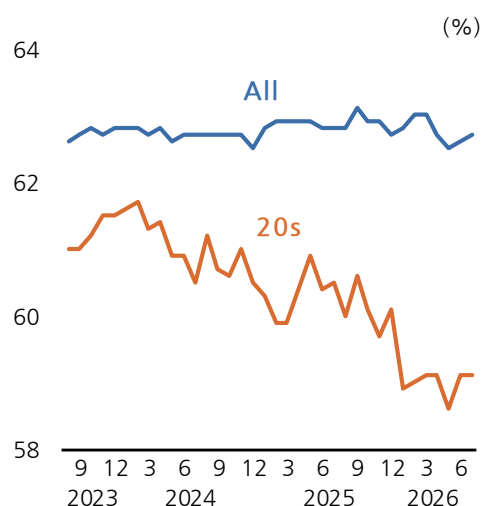

- The employment rates among those in their 50s and those aged 60 and over rose by 0.5%p and 0.2%p, respectively, driving the increase in the overall employment rate.
- However, the employment rate for those in their 20s remained low at 59.1%, unchanged from the previous month, while their unemployment rate rose by 0.5%p, suggesting that improvement in youth employment conditions remains limited.

Changes in the Number of Employed Persons by Sector

Source: Ministry of Data and Statistics.

Employment Rate by Age Group (Seasonally adjusted)

■ Consumer price inflation rose sharply, mainly owing to base effects, while the underlying pace of inflation, excluding those effects, was broadly unchanged from the previous month.

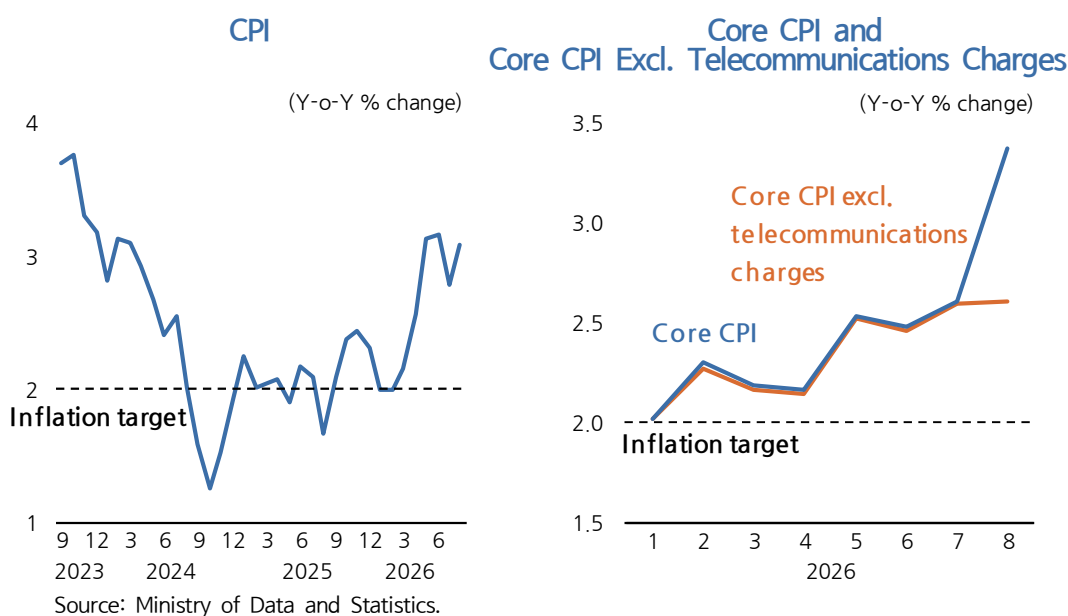

● In August, headline inflation (2.8% → 3.1%) increased from the previous month, mainly reflecting base effects from telecommunications charges.

- Public service prices (1.4% → 6.5%) rose sharply owing to base effects from telecommunications discounts introduced a year earlier, accounting for most of the increase in headline inflation.
- By contrast, prices of agricultural, livestock, and fisheries products (0.9% → -2.6%) declined, largely reflecting base effects in agricultural products.
- Petroleum product prices (15.5% → 14.2%) continued to rise at a pace similar to the previous month as the oil price cap remained unchanged. However, renewed geopolitical risks could exert additional upward pressure going forward.

* Dubai crude (\$/bbl, monthly average): (Jun.) 79.5 → (Jul.) 76.8 → (Aug.) 88.8

● Underlying inflation remains elevated, while core inflation (excluding food and energy, 2.6% → 3.4%) rose sharply, reflecting telecommunications-related base effects.

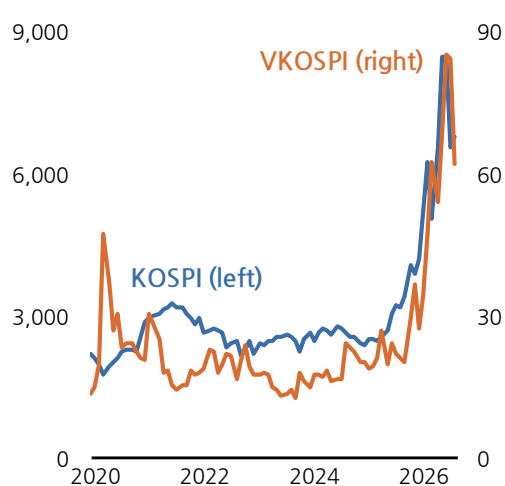

- Excluding the effect of telecommunications charges, core inflation (2.6%) was unchanged from the previous month, suggesting that underlying inflationary pressures had not intensified further, but remained above the inflation target at an elevated level.
- The elevated pace of core inflation appears to have been driven to a significant extent by both domestic demand pressures and supply-side factors associated with stronger global semiconductor demand and the Middle East crisis.

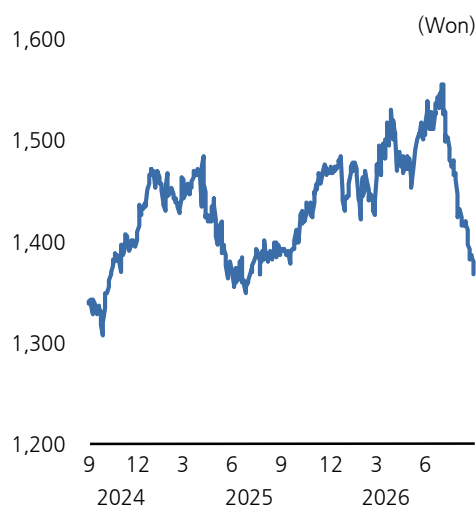

■ **Financial markets** continue to experience elevated volatility, particularly in the stock market, while **credit market conditions remain stable overall**.

- Market interest rates rose further in August following the base rate hike.
 - Government bond (KTB) yield (3-year, month-end, %):
(May) 3.73 → (Jun.) 3.70 → (Jul.) 3.76 → (Aug.) 3.84
- The won appreciated markedly against the dollar, reflecting the base rate hike and broad-based dollar weakness.
 - Won/dollar exchange rate (month-end):
(May) 1,507.9 → (Jun.) 1,549.4 → (Jul.) 1,424.0 → (Aug.) 1,368.6
- With equity market volatility still elevated, stock prices edged up despite higher market interest rates, supported by expectations of improving business conditions in AI- and semiconductor-related sectors.
 - KOSPI (month-end): (May) 8,476.2 → (Jun.) 8,476.5 → (Jul.) 6,595.5 → (Aug.) 6,820.0
 - The KOSPI 200 Volatility Index (VKOSPI, monthly average, 84.6 → 62.2) fell from the previous month but remained well above its long-term average (20.4, since 2015).
- Credit risk indicators remain relatively stable, with the corporate loan delinquency rate falling partly due to quarter-end effects and the CDS premium remaining low.
 - The delinquency rate on bank corporate loans, which had risen through May, fell relatively sharply in June, partly reflecting financial institutions' quarter-end balance-sheet management.
 - The sovereign CDS premium (21.6bp at end-August), which reflects default risk on government foreign-currency debt, remained below its long-term average (38.5bp, since 2015), as in the previous month (22.8bp).

KOSPI and VKOSPI

■ **The housing market continues to see strong increases in both sales and rental prices, particularly in the Seoul Metropolitan Area (SMA).**

- In July, nationwide housing sales prices※ (month-on-month, 0.33% → 0.35%) rose at a faster pace, driven mainly by the SMA.
 - Price growth accelerated in both Seoul (1.03% → 1.09%) and Gyeonggi province (0.59% → 0.65%), with the SMA (0.67% → 0.72%) continuing to post strong gains.
 - By contrast, housing sales prices outside the SMA (0.01% → 0.01%) remained broadly flat, while transaction volume (30,000 units → 28,000 units) fell below the July average for the past three years (2023-25, 29,000 units), pointing to continued weakness.
- Housing rental prices (jeonse: 0.38% → 0.38%, monthly rent: 0.38% → 0.38%) also continued to rise rapidly, particularly in the SMA.
 - Jeonse prices in the SMA (0.71% → 0.68%) continued to rise, while monthly rent growth in the SMA (0.62% → 0.64%) reached its highest rate since 2015, contributing to mounting housing cost burdens.
 - By contrast, both jeonse prices (0.08% → 0.10%) and monthly rents (0.15% → 0.14%) outside the SMA continued to rise only modestly.

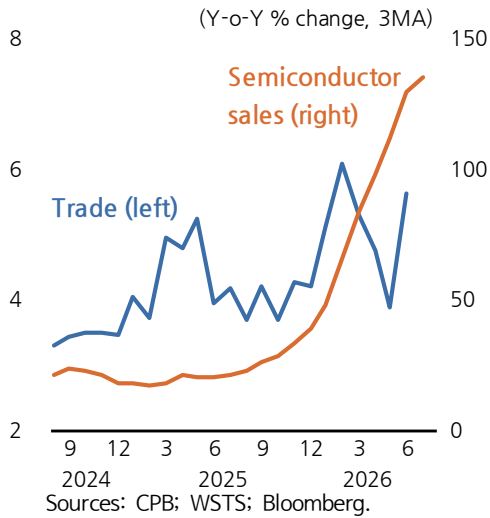

※ Based on the Korea Real Estate Board's National Survey of House Price Trends.

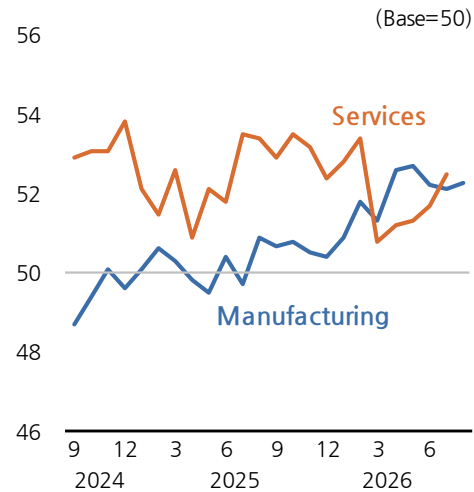

■ The global economy continues to face elevated uncertainty, reflecting the adverse effects of the Middle East war and concerns over U.S. rate hikes, even as manufacturing conditions are expected to improve.

- Global trade growth strengthened amid favorable semiconductor market conditions, while manufacturing sentiment diverged across countries but improved overall.

Global Trade and Semiconductor Sales

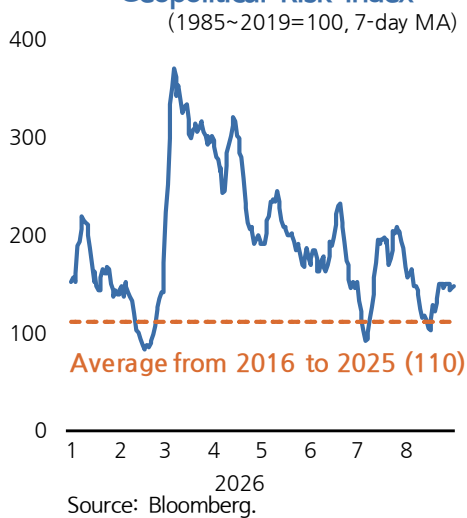

Global PMI

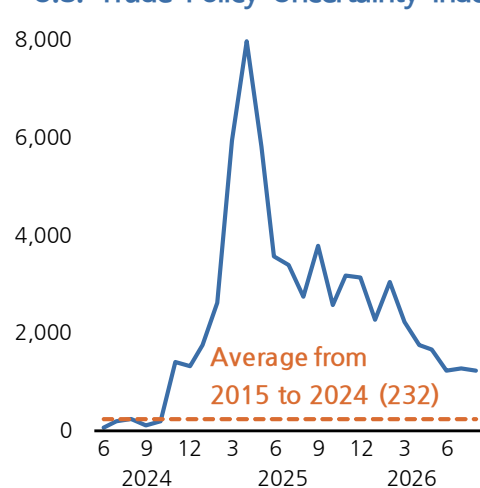

- However, downside pressures on the global economy are still elevated, with the Middle East war ongoing and uncertainty over U.S. trade policy persisting.

Geopolitical Risk Index

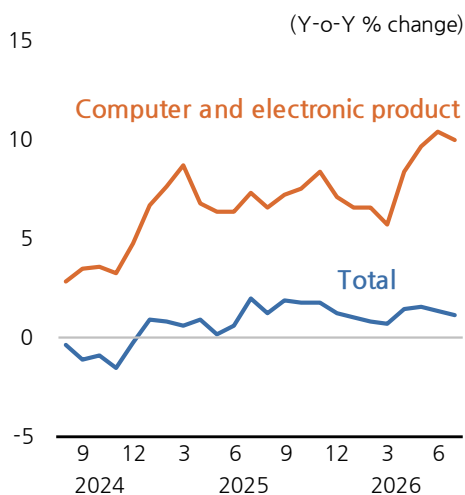

U.S. Trade Policy Uncertainty Index

- The U.S. economy continues to grow at a moderate pace, led by domestic demand, although uncertainty surrounding employment and consumption conditions is gradually increasing.

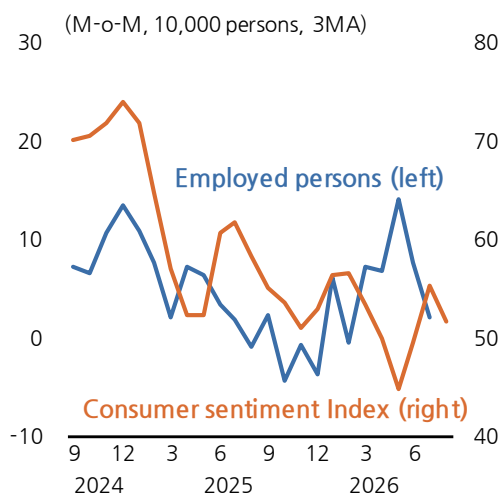

- Production and investment in AI-related industries remain solid, but downside risks to economic activity persist, with declines in employment and consumer sentiment among them.

U.S. Industrial Production

Sources: FRB; BLS; Bloomberg.

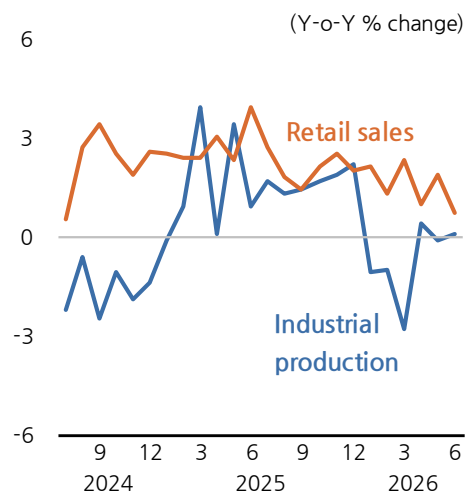

U.S. Employment and Consumer Sentiment Index

- The euro area economy continues to show weakness, with key real activity indicators still subdued amid the fallout from the Middle East war, despite expectations of a recovery supported by improving business sentiment.

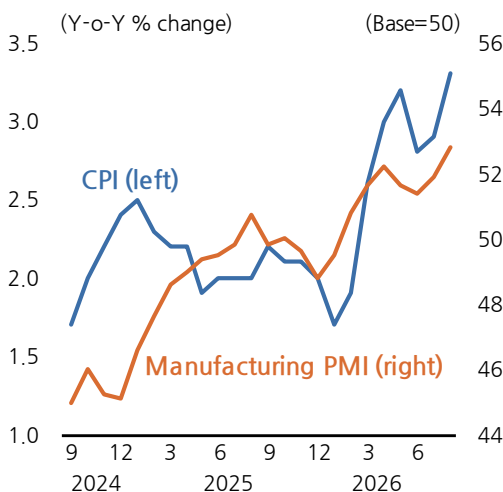

- The manufacturing sentiment index remains in expansionary territory, supported by stronger AI-related demand and increased government spending. However, economic uncertainty is still elevated amid stagnant production and accelerating consumer price inflation.

Industrial Production and Retail Sales in the Euro Area

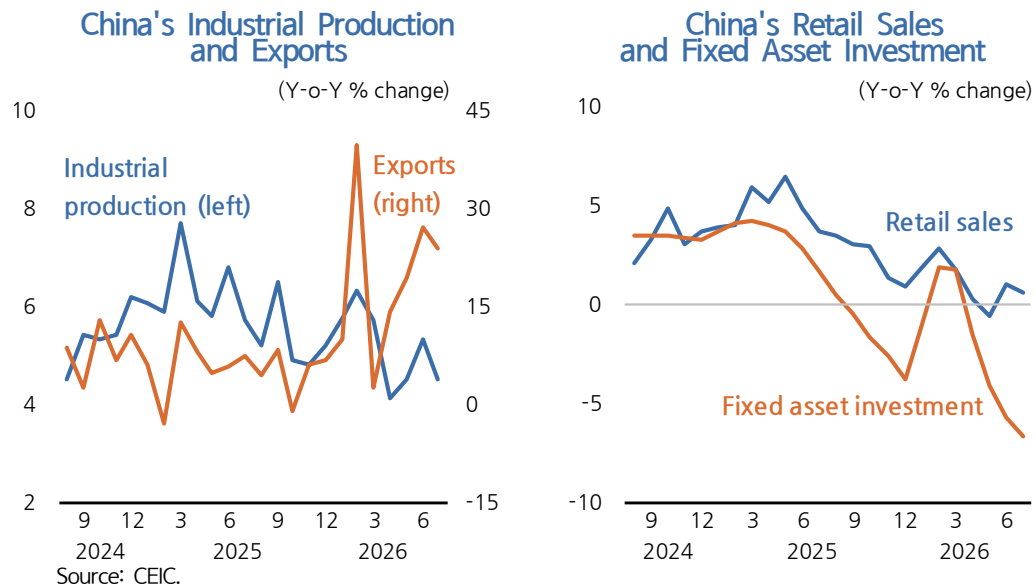

Sources: Eurostat; Bloomberg.

CPI and Manufacturing PMI in the Euro Area

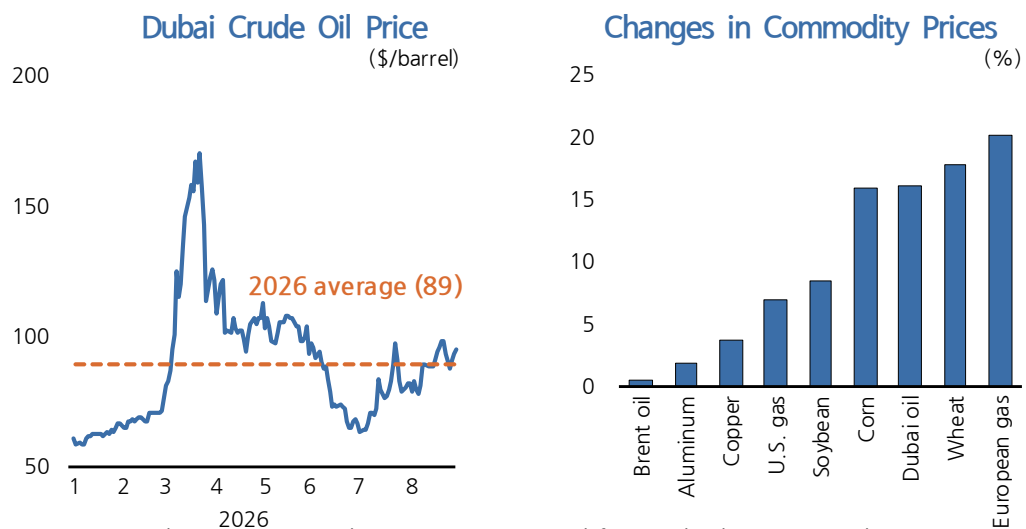

- The Chinese economy shows signs of a broad-based slowdown as weakness in domestic demand deepens, despite continued solid export growth.

- In July, growth in industrial production, retail sales, and fixed asset investment all slowed, while most indicators other than investment in advanced industries and exports remained weak.

- Oil prices were highly volatile in August in response to developments in the Middle East war, while prices of some commodities rose sharply.

- Natural gas prices continued to rise sharply in Europe amid concerns over supply disruptions, while prices of major grains also surged owing to supply concerns and unusual weather conditions.

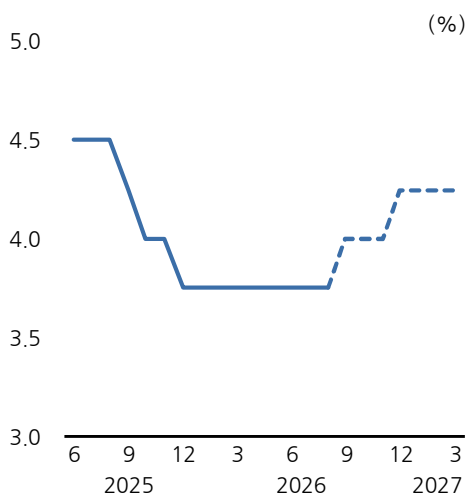

Note: Changes in commodity prices are measured from end-July 2026 to end-August.
Sources: Korea National Oil Corporation; Bloomberg.

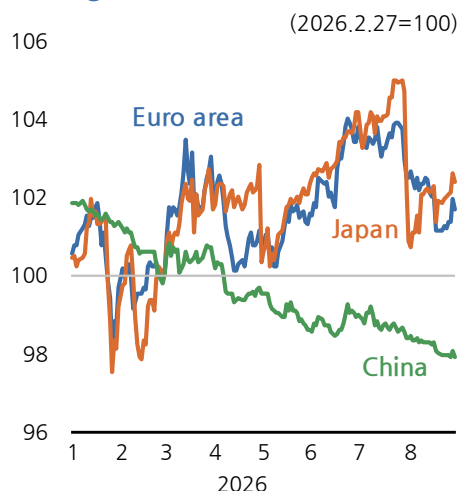

- Major indicators in international financial markets continue to fluctuate in response to developments in the Middle East and shifts in the outlook for U.S. monetary policy.

- In August, the U.S. dollar weakened against most major currencies except the yen, but strengthened again toward the end of the month as expectations of a rate hike increased.

U.S. Federal Funds Rate Outlook

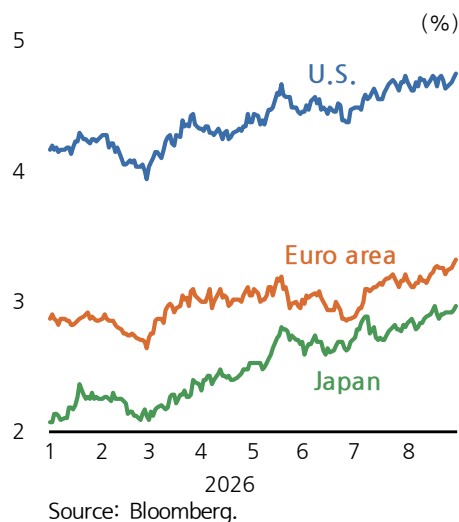

Exchange Rates of Major Currencies against the U.S. Dollar

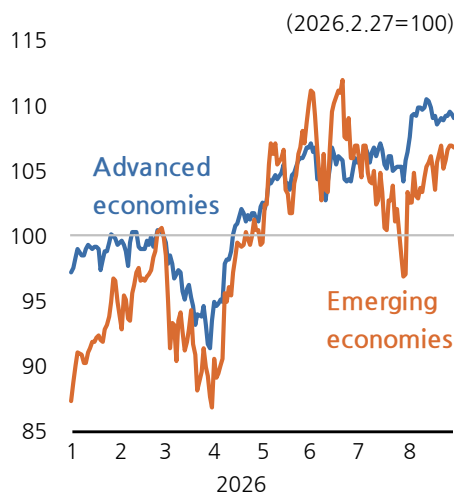

- Long-term interest rates in major economies continued to rise, driven mainly by fiscal concerns, while gains in major equity markets, supported by expectations of stronger corporate earnings, were pared toward the end of the month as concerns over U.S. rate hikes intensified.

주: 1) 가격은 전기대비 증가율.

2) 주택전월세거래량은 국토교통부 실거래가 기반 원자료.

3) 미분양주택수는 전기대비 증감.

4) p는 잠정치.

자료: 한국부동산원; 국토교통부.

Notes: 1) Price indices are based on period-on-period percent changes.

2) Jeonse and monthly rent transaction volumes are based on raw data from the Ministry of Land, Infrastructure and Transport.

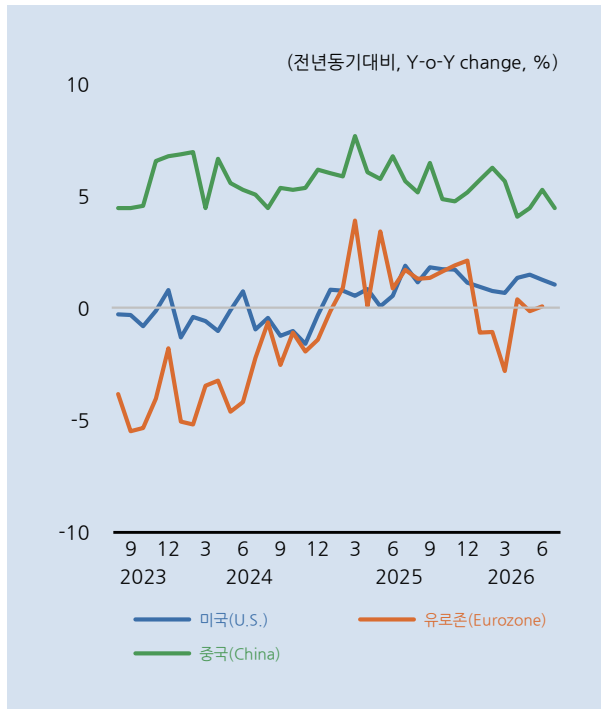

3) The number of unsold new housing units is based on changes from the previous period.

4) p denotes preliminary figures.
